EDUCATION

University of Waterloo

Expected 2028

Bachelor of Computer Science and Finance - Double Major

GPA: 3.8/4.0

- President's Scholarship of Distinction (\$5000), Undergraduate Achievement Award (\$1500)
- Statistics Minor

Relevant Coursework: Functional Programming (Advanced), Interpreters (Advanced), Linear Algebra, Calculus, Probability, Statistics, Proofs, Financial Markets & Data Analytics

SKILLS

Languages Python, Java, C++, C#, C, Go, Kotlin, TypeScript, SQL, Bash

Technologies Temporal, gRPC, REST, PyTorch, Pandas, VictoriaMetrics, PostgreSQL, MongoDB, React, Actions

Tools Linux, Git, Docker, AWS EC2, OpenRouter, Jupyter, Modal, Supabase, Vercel

WORK EXPERIENCE

Roblox

Jun 2026 – Present

Software Engineer Intern (Network Reliability) | Go, Python

San Mateo, CA

- Built an automated CI/CD pipeline that deploys configuration changes across **5,000+** network devices in global datacenters, cutting deployment time by **96%**
- Designed and orchestrated Temporal workflows for safe, gated deployment of configuration changes, validating changes on canary devices before progressive fleet-wide rollout with **30+** parallel workers
- Identified and fixed a resource leak in an internal network service, preventing API lockout and recovering **7%** CPU utilization across devices

Sunnybrook Research Institute

Jul 2025 – Aug 2025

Software Research Intern | Python

Toronto, ON

- Built an event tracing and playback tool to simulate medical professionals' interactions with **Focused Ultrasound** software, enabling realistic testing and diagnosis of software defects, unintended user behaviours, and edge cases
- Created an automated software testing framework which generates synthetic and replayable JSON event flows, reducing software testing times by **91%**
- Made a logging API to validate test results against baselines, catching **7** software defects before production release

Waterloo Quant Club

Jan 2026 – Present

Technical Executive | Rust, Python, TypeScript

Waterloo, ON

- Developed 2v2 Bluff, a 4 player trading game where players must claim or challenge poker hands, reaching **150+** monthly active users
- Worked on the backend for waterlooqueantclub.com, managing member emails and contributing to key infrastructure for **100+** competitors at club's exclusive trading competition

PROJECTS

Data Science Club Website | TypeScript, React, Supabase, HTML, CSS

- Maintained www.uwdatascience.ca, UWaterloo's data science club website serving **600+** members
- Replaced the executive team's manual term-start **Google Form** with an in-app onboarding flow backed by a normalized **Supabase/Postgres** schema that autofills profile and role data from existing records

PeerAssist - Full-Stack Peer Reviewing | Java, MongoDB, Apache PDFBox, Maven

- Created a full-stack **Java** desktop application for 20+ students to upload, review, and grade peers' academic work
- Integrated a **Supabase** backend for authentication and data storage, enforcing **Row-Level Security** policies across profiles, documents, and reviews tables to control per-user access
- Rendered uploaded PDFs with **Apache PDFBox** and added search, sorting, and ranking by average review score; packaged the app into a single zero-config executable JAR via **Maven** shade plugin

Trust No Ghost - 3D Maze Exploration Game | Unity, C#, Itch.io

- Shipped **Trust No Ghost** for **60+** users at the UW Game Jam Fall 2025, placing in the **top 10** most rated games
- Harnessed Unity and C# to develop expanding maze designs, AI pathfinding algorithms, and dynamic moving mechanics
