## WORK EXPERIENCE

### Roblox

Jun 2026 – Aug 2026

Software Engineer Intern (Network Reliability) | Go, Python

San Mateo, CA

- Automated the Network Engineer deployment process, pushing configs to **5,000+** devices in global datacenters
- Built a GitHub Actions CI/CD pipeline to eliminate manual tasks, saving **30+ engineering hours** per month
- Orchestrated Temporal Workflows & LLM analysis for safe, autonomous deployment of network changes, preventing outages/misconfigurations and identifying issues on **20+** network devices
- Identified and fixed a resource leak in an internal network service, recovering **7%** CPU utilization across devices

### WQC

Jan 2026 – Present

Software Engineer (DevOps) | Rust, Python, AWS

Waterloo, ON

- Engineered [portal.waterlooquantclub.com](#), a full-stack portal hosted on AWS for **700+** members, supporting JWT authentication, custom application forms, resume uploads, reviewer workflows, and Excel exports
- Solo-developed a Grafana observability platform using PostgreSQL, TLS, and AWS, providing real-time monitoring of **100+** metrics and automatic **Discord bot alerting** for critical service failures
- Built and deployed [2v2bluff](#), a real-time multiplayer **Rust/WebSocket** card game supporting four concurrent players

### Sunnybrook Research Institute

Jul 2025 – Aug 2025

Software Research Intern | Python

Toronto, ON

- Built an event tracing and playback tool to simulate medical professionals' interactions with **Focused Ultrasound** software, enabling realistic testing and diagnosis of software defects, unintended user behaviors, and edge cases
- Created an automated software testing pipeline that generates synthetic and replayable JSON event flows, reducing software testing times by **91%**
- Developed a logging service to validate test results against baselines, catching **4** software defects before production release

## PROJECTS

**Pharmagotchi – Pharmacy Companion App** | Android Studio, Figma, Kotlin, XML, OpenRouter

- Built a Tamagotchi-inspired mobile health-companion app to track medications and health, backed by an offline Room database and WorkManager background reminders
- Integrated an **OpenRouter**-powered chat assistant with Retrieval-Augmented Generation (RAG) that parses health conditions and medications into structured JSON vitals and provides context-aware medication guidance
- Connected Fitbit tracking devices through the Google Health API, centralizing health data for seamless cross-device monitoring

**PeerAssist – Peer Review Platform** | Java, Supabase, Apache PDFBox, Maven

- Created a full-stack **Java** desktop application for **20+** students to upload, review, and grade peers' academic work
- Integrated a **Supabase** backend for authentication and data storage, enforcing **Row-Level Security** policies across profiles, documents, and reviews tables to control per-user access
- Rendered uploaded PDFs with Apache PDFBox and added search, sorting, and ranking by average review score; packaged the app into a single zero-config executable JAR via **Maven** shade plugin

## SKILLS

Languages Python, Java, C++, C#, C, Go, Kotlin, TypeScript, SQL, HTML, CSS, Bash

Technologies Temporal, gRPC, REST, PyTorch, Pandas, Grafana, PostgreSQL, MongoDB, React, Actions

Tools Linux, Git, Docker, AWS (EC2, S3, Lambda, etc.), OpenRouter, Jupyter, Supabase, Android Studio

## EDUCATION

University of Waterloo

GPA: 3.8/4.0

Bachelor of Computer Science, Finance, & Statistics – Triple Major

- President's Scholarship of Distinction (**\$5000**), Undergraduate Achievement Award (**\$1500**)
- Relevant Coursework: Object-Oriented Programming (Advanced), Sequential Programming (Advanced), Functional Programming (Advanced), Interpreters (Advanced), Linear Algebra, Data Analytics
